

C2000 Classic Series

CLASSIC C2000

Nothing outclasses a classic

The smooth curves and sleek lines of the C2000 Classic Series reflect the latest interior design trends. Remarkable and affordable, C2000 features a level of quality and elegance that you would expect from electrical accessories costing much more.

The choice of colours and finishes available with C2000 is quite outstanding. There are metal cover finishes as well as moulded covers.

As covers and gridplates are interchangeable, you can create combinations to match the particular décor theme you are trying to achieve.

SC2000 Slimline™

SLIMLINE™
SC2000

A classic, sliced extra thin

At first glance, Slimline™ looks exactly like our C2000 Classic Series switches and sockets. Viewed from the side however, it's a completely different story. Clipsal has taken a Classic and sliced it extra thin! The result is Slimline™, a range of switches and sockets that are only 4mm thick (or should we say thin) making them the thinnest switch plate in the world. For many years, architects, builders and interior designers have been requesting slim switches that will blend into the wall surface.

Previously, the only option was the more expensive metal plate switches. With Slimline™, there is a comprehensive range that is unique but still looks at home when used with regular C2000 Classic products.

A range of metal plate covers are available in the Slimline™ Range too. They are sure to add a touch of class at a fraction of the cost. The new Chrome Shadow™ finish not only provides a stainless steel look, but it is the only option that provides switch mechanisms and power point sockets in a metal finish.

SL2000 Eclipse®

A work of Art

Over 80 years of evolution has kept Clipsal electrical products at the cutting edge of technology. Little surprise then, that the new Eclipse® Range of switches and sockets offers the thinnest switch plates in the world. With a remarkably thin 4mm profile, they are up to 60% thinner than others.

It is this understated design that truly distinguishes the Eclipse® Range from our other products on offer.

The sleek elegance of Eclipse® rests smoothly on any surface to ensure a slim and highly fashionable finish. As with Slimline™, a range of metal plate covers are available in the Eclipse® Range too.

They are sure to add a touch of class at a fraction of the cost. The Eclipse® range is also available in Clipsal's unique Chrome Shadow™ finish. This world first technology ensures that the entire switchplate, mechanism and/or socket has the stainless steel look. Chrome Shadow's unique finish resists annoying fingerprint marks and tarnishing. Switch and socket innovation has never looked this good.

*For information on how the Eclipse® Range can be used for C-Bus® and HomeMinder applications turn to page 17.
